FOR IMMEDIATE RELEASE

**Catalyst Energy Services Appoints Leslie “Les” Trammell as
District Quality, Health, Safety, Environmental (QHSE) Coordinator**
New Role Created to Bolster QHSE Education, Training and Communication

MIDLAND, Texas (October 2022) – Catalyst Energy Services announces the appointment of Leslie “Les” Trammell to the newly created role of District QHSE Coordinator. An innovative hydraulic fracturing service company that puts safety first, Catalyst Energy Services created the role of District QHSE Coordinator to enhance the safety culture in support of Quality, Health, Safety and Environmental (QHSE) compliance.

“While we are in the early years of the company, we recognize that getting the QHSE space firmly grounded in compliant work practices is unequivocally important to the health, growth and well-being of everyone who works here,” said Stan Boatwright, QHSE Director. “Les has an outstanding career with decades of experience. He embodies and lives the qualities it takes to engage with our employees at all levels, as well as instilling a safety-first mindset through his example. He’s passionate about and instrumental in developing the human experience and focusing on a strong safety culture that upholds the company’s operations goals.”

In his District QHSE role, Trammell will work with supervisors and crews as a coach and mentor to develop internal capacity that ensures a robust safety culture. Specifically, he will identify error-likely situations, utilize tools to reduce the potential for error, and minimize hazards and at-risk behaviors. He will also reinforce QHSE principles through regular communications of Safe Work Best Practices, Safe Work Programs and environmental mindfulness.

About Catalyst Energy Services

Catalyst Energy Services started with the idea that technology is the key to the future. We take the stewardship of preserving our world’s resources seriously, and we’re passionate about our industry because we help people every day. From manufacturing to transportation, from protecting frontline workers to creating everyday products, our industry keeps people safe, happy and connected.

We are an emerging stimulation service company specializing in hydraulic fracturing treatment with the equipment, people and technology to get your investment online as soon as possible. Built by an accomplished executive team with over 100 years of hands-on experience in the field, engineering and business management, we are supported by a highly experienced and knowledgeable operations team to maximize equipment efficiency and achieve optimal operational results.
